

Early Childhood Resources

General Resources

Alliance ACTION Information Sheets

[Assistive Technology for Infants, Toddlers, and Young Children with Disabilities](#)

An information sheet regarding assistive technology in early childhood programs.

Assistive Technology Resources

[Frank Porter Graham Child Development Institute](#)

Strategies and resources for making access to learning opportunities for young children easier within the environment.

Early Childhood and Assistive Technology

[Center on Technology and Disability](#)

Resource articles for early childhood development and assistive technology.

Early Childhood Technical Assistance Center

[AT for Infants, Toddlers, and Young Children](#)

Resources for general information, federal law, definitions, funding, and information.

Families and Advocates Partnership for Education (FAPE)

[FAPE AT for Infants and Toddlers](#)

A four page fact sheet addressing AT devices and implementation options for young children.

Idaho Assistive Technology

[Idaho AT for Early Childhood](#)

Full presentation regarding assistive technology processes, devices, strategies, funding, etc.

South Carolina Fact Sheet

[AT for Infants and Toddlers](#)

A two page fact sheet addressing AT devices and implementation options for young children.

Special Education Director Institute

[Special Education Director Institute](#)

General overview of assistive technology.

MN Regions 5 & 7 Assistive Technology Community of Practice (2016)

Supporting Early Literacy Through UDL and AT **[EC Literacy Through UDL and AT](#)**

A presentation describing “high quality early literacy opportunities through universal design for learning and providing support for curriculum modifications and adaptations through assistive technology.

Technology to Improve Kids’ Educational Success (TIKES) **[PACER TIKES Project](#)**

“The TIKES Project helps to open doors for parents and providers by educating them on promoting the use of assistive technology with children and students with disabilities ages birth to 5. Assistive technology can support young children in building skills, increasing participation in activities, promoting development, enhancing learning, and boosting self-esteem.”

Tots ‘n Tech **[Tots ‘n Tech](#)**

This website is an inter-university collaboration “to provide up-to-date information and resources about adaptations, including assistive technology, to use with infants and toddlers.”

Using Adaptations & Assistive Technology **[Promote Children’s Participation](#)**

This webinar handout walks you through using AT as an intervention with infants and toddlers. It defines the differences between participation and skill learning and how adaptations help children participate and learn functional skills.
